FOREWORD

This bulletin is based on the carlot unloads of fruits and vegetables at 15 Pennsylvania cities.

These carlot unloads show the rail receipts of various fruits and vegetables for consumption within the large centers of population of the Commonwealth.

The cities covered in this survey are, in order of population according to the 1920 census: Philadelphia, Pittsburgh, Scranton, Reading, Erie, Harrisburg, Wilkes-Barre, Allentown, Johnstown, Altoona, Lancaster, Bethlehem, York, Williamsport and Easton. The railroads which serve these cities have furnished these statistics from their records.

These unload figures do not show the exact consumption of fruits and vegetables in Pennsylvania cities because of the great quantities of produce consumed which have been trucked from nearby producing areas.

No complete figures of receipts by truck into Pennsylvania cities are available, but this movement is known to be of great proportions and increasing in most cities.

The tables in this bulletin are printed to assist in determining the actual consuming demands of Pennsylvania cities, and to show the sources and volume of competitive supply for which Pennsylvania-grown products might be substituted.

The Fruit and Vegetable Supply for Fifteen Cities, 1929

By D. M. James, Bureau of Markets

The expansion of the fruit and vegetable industry in various sections of the country in recent years has made available a year-round supply of many fresh fruits and vegetables, and has extended the season for other commodities which were formerly only obtainable in Pennsylvania markets for a short period of the year.

Increased production in a widely scattered territory, increased storage facilities in both producing and consuming areas, extension of the marketing season for a commodity by growing several varieties to cover a longer harvesting or marketing period, and improved transportation facilities, augmented by better refrigerator car equipment, have all been factors in making this year-round supply of fruits and vegetables possible.

Since 1921 the Pennsylvania Bureau of Markets has made yearly surveys of the rail supply in 15 Pennsylvania cities. The figures for each city are given in full detail here for the year 1929, while figures for previous years have been summarized into composite tables for the entire group of cities to show the trend of receipts from Pennsylvania compared with other sources, of various commodities over a 7 year period, from various states, and at these 15 cities over a 5 year period.

SOURCES OF CARLOT SUPPLY

The enormous consuming power of Pennsylvania markets is strikingly illustrated by the fact that every state in the Union, except Rhode Island and Nevada, and many foreign countries ship fruits and vegetables into Pennsylvania to feed the ten million inhabitants of the Commonwealth.

Acknowledgment is due the United States Department of Agriculture for information and cooperation, and to the railroads in the Commonwealth for their willingness to make available all the necessary records for this study.

Table 1. Carlot Receipts of Various Commodities From Pennsylvania And From All Other Sources, 1923-1929

Commodity		Average 1923-1929	1929	1928	1927	1926	1925	1924	1923
Total from Pennsylvania -----		3,600	3,412	3,213	3,421	2,975	4,304	4,147	3,799

	From Other States --	201	154	169	195	157	153	237	341

Receipts from Pennsylvania. Table 1 shows the receipts of nine products which the 15 markets have received from production areas in Pennsylvania, compared to receipts from all other sources in the years 1923 to 1929, inclusive. It will be noted that apple receipts have been irregular from the apple shipping district of the Commonwealth, due largely to the yearly variation of the commercial apple production. However, rail receipts from outside sources have decreased considerably since 1923, indicating that consuming areas of

the Commonwealth are drawing more heavily upon nearby production and less upon shipped-in supply.

Cabbage receipts from Pennsylvania have been meager and irregular from year to year. From outside sources receipts were decreasing from 1924 through 1927 and from that year through 1929 have increased considerably.

The trend of celery receipts from Pennsylvania is downward, whereas the increase in total receipts of this commodity indicates the increasing demand for the green, leafy vegetables which is also noted in lettuce receipts.

The Pennsylvania grape shippers are supplying a very small portion of the carlots used in cities of the Commonwealth. Total receipts of

Fig. 1. Auction and Storage Units of the Baltimore and Ohio Reading Produce Terminal, Philadelphia.

grapes are diminishing, having reached a lower figure in 1929 than during any of the previous 6 years. On the other hand, receipts of onions were heavier in 1929 than in the preceding years, although the supply from Pennsylvania is very limited.

The supply of peaches, both from within the state and from points outside are quite irregular from year to year, due to variations in the available supply.

Potato supplies for Pennsylvania cities are quite heavy from producing sections in the state, some years approximately 25% of the total supply. The supply from all sources was greater in 1929 than during any of the preceding 6 years.

*This table includes receipts of apples, cabbage, celery, grapes, lettuce, onions, peaches, potatoes and turnips.

Receipts by States. Table 2 shows the combined receipts of apples, cabbage, celery, grapes, lettuce, onions, peaches, potatoes and turnips from states of origin for years 1923 through 1929, inclusive. Pennsylvania ranked fourth of all the states in supplying these commodities to Pennsylvania cities during 1929, following California, New York and Virginia in the order named.

California is the chief shipper of fruits and vegetables to this Commonwealth, supplying nearly 25 per cent of the nine products, listed in Tables 1 and 2, to our markets in 1929. In addition, the Pacific Coast State ships over half the oranges and cantaloupes used, as well as numerous other products.

Receipts from New York State have declined steadily since 1924, while receipts from Virginia have increased. Arizona, Maine and Texas are other states which have shown the most marked increase since 1923, supplying principally lettuce, potatoes and onions, respectively.

COMMODITIES SUPPLIED

Variation in total production of crops directly influence receipts of these crops in the markets. Consequently variations may be expected from year to year on practically all commodities. Therefore, the trend of a commodity over a number of years is of more importance than the receipts for a single year, which may be abnormally heavy or light, depending on size of crop and resulting prices for that year.

Table 3. Carlot Receipts of Important Commodities at 15 Pennsylvania Cities, 1923-1929

Commodity	Average 1923-1929	1929	1928	1927	1926	1925	1924	1923
Apples -----	5,793	5,255	4,610	4,418	6,117	5,843	6,872	7,434

Watermelons -----	3,124	3,557	3,133	3,072	3,719	2,958	3,236	2,194

* Receipts of bananas at Philadelphia and Pittsburgh not included.

Table 3 shows the receipts of principal commodities at 15 Pennsylvania cities 1923 to 1929, inclusive, with the 7 year average. It is seen that potatoes have the heaviest receipts, that oranges increased greatly in 1929 to replace grapes as the second heaviest in supply, and that apples ranked fourth in volume of receipts.

Commodities showing the greatest tendency to increase are the leafy vegetables such as lettuce, celery, spinach and cabbage. Oranges also show a large increase since 1923, while potatoes show the greatest falling off, which is no doubt largely due to increased truck supplies from production areas in Pennsylvania and nearby states.

SEASONAL SUPPLY

The rail receipts of fruits and vegetables in Pennsylvania markets vary from month to month throughout the year. These receipts are dependent on various factors: namely, supplies available in nationwide earlot production areas, supplies available within local production areas, commodity prices, stable market demands and seasonal market demands. Table 4 shows the earlot receipts at the 15 Pennsylvania cities in 1929 by months, and yearly receipts by cities for the years 1925 to 1929, inclusive. Combined receipts were only 5,731 cars in January, 1929. These increased to 9,996 cars in July, dropped to 6,709 cars in August, increased to 10,612 cars in October (the peak for the year), and then decreased steadily through November and December.

This table also indicates the change which is taking place in the fruit and vegetable business in many of the smaller cities of the Commonwealth. Many of these cities in 1925, or previously, received a great deal more of their produce supply by rail shipments than is the case at the present time. Allentown has decreased from 1,836 cars received in 1925 to only 984 in 1929. Altoona has dropped in earlot receipts from 2,212 to 1,292 during the same period. Bethlehem, Easton, Harrisburg, Johnstown, Lancaster, Reading and York have all shown the same tendency to receive a lighter supply of produce by rail than formerly. These cities are all within easy truck haul distance of either Philadelphia, Pittsburgh or Baltimore, and a great deal of produce which had previously been received in solid cars from producing sections, or in mixed cars from the larger produce markets, is now being purchased daily in the produce markets of the larger cities, and being trucked to the smaller cities. Erie, Scranton, Wilkes-Barre and Williamsport have increased receipts of earlots during the past five years in the face of increased truck hauling.

Table 4. Total Carloads of all Commodities Received at 15 Pennsylvania Cities by Months (1929 with comparisons)

*For Philadelphia, figures do not include receipts of bananas.

**For Pittsburgh, figures do not include receipts of bananas, beets or carrots; nor in 1925, 1926 and 1927 mixed produce and turnips.

THE 1929 SUPPLY IN THE 15 CITIES

Philadelphia Receipts. The supply of all commodities increased sharply from 41,961 carlots in 1928 to 46,558 in 1929 at Philadelphia. Pennsylvania furnished 2,091 of these cars in 1928, compared with 2,166 cars in 1929. However, only 41% of the Philadelphia late potato supply originated in Pennsylvania in 1929, compared with 51% from the Commonwealth during 1928. Ten per cent of the rail receipts of apples were from Pennsylvania in 1929, compared with 8% in 1928. Receipts of oranges showed the greatest increase in 1929, with 5,415 cars compared with 3,449 in 1928. All other commodities showed increased receipts in Philadelphia in 1929 over 1928 except asparagus, celery, cucumbers, grapes, peaches, pears, plums and spinach.

Pittsburgh Receipts. Carlot receipts of fruits and vegetables increased at Pittsburgh to 28,812 from 23,800 cars in 1928. Pennsylvania growers furnished 685 of these cars in 1929, compared with 417 during 1928. Oranges, potatoes, apples, lettuce and tomatoes showed the greatest increases, while the only commodities to decrease were asparagus, grapes, peaches and strawberries.

Scranton Receipts. Fruit and vegetables receipts by rail were 424 cars less in Scranton during 1929 than in 1928. This decline was largely due to the drop in receipts of potatoes from 1,309 cars in 1928 to only 950 in 1929. The Scranton market received many more potatoes by truck from nearby points during 1929 than in 1928. Nearly all commodities were supplied in lesser volume in 1929 than in 1928, oranges, grapefruit, apples, onions and watermelons being the chief exceptions.

Reading Receipts. A reduction in carlot receipts of 119 cars was noted in Reading from 1928 to 1929. This market, which is within quick truck hauling distance of Philadelphia is rapidly going over to the method of purchasing fruits and vegetables more frequently and in smaller quantities in the Philadelphia produce markets in place of the less frequent and larger quantity purchase of solid carlots from production areas. Receipts of all commodities decreased during 1929 excepting apples, cantaloupes, grapes, onions, oranges, sweet potatoes and watermelons.

Erie Receipts. There was a reduction of 57 cars of fruits and vegetables in Erie from the 1928 receipts of 923 cars. Receipts of potatoes declined from 217 to 113 cars, indicating that nearby stocks replaced much of the shipped in receipts of the previous year. Although cabbage receipts increased from 10 cars in 1928 to 30 in 1929, these were all of early stock which was principally on the market when Erie County growers had none to offer. Grape receipts, all from California,

Fig. 2. Display Room of the Baltimore and Ohio Reading Produce Terminal, Philadelphia.

decreased from 31 to 19 cars. Many of these were received early in the season before the Erie County Concords were harvested.

Harrisburg Receipts. Carlot receipts at Harrisburg have continually decreased since 1926, receipts that year being 2,602 and in 1929 only 1,998. This steady decline is due to increased truck hauling from Baltimore and Philadelphia, and to the sale of heavier supplies of nearby produce in the city markets. Only 4 cars of apples were unloaded during 1929, compared with 18 in 1928. Peaches decreased from 71 to 16 cars, while potatoes increased slightly, from 162 to 165.

Wilkes-Barre Receipts. The 1929 receipts of fruits and vegetables were 378 carloads greater than during 1928. Pennsylvania growers supplied nearly 20% of the apple receipts, 8% of the peach receipts and 28% of the late potatoes used in this market. Receipts of most commodities increased during the year, those decreasing being cucumbers, chicory, peaches, pears, plums and strawberries.

Allentown Receipts. Carlot receipts have decreased continuously since 1925, when there were 1,836 cars unloaded, to 1929 when there were only 984. Much of this decrease is in mixed cars of fruits and vegetables from Philadelphia, a larger portion of which is now being hauled by truck than formerly. Allentown received only 4 cars of competitive late potatoes, these from Maine, compared with a combined total of 14 cars from Maine, Michigan and New York during 1928.

Johnstown Receipts. Fewer carlots of fruits and vegetables were received in Johnstown during 1929 than in any of the preceding 4 years. These receipts numbered 1,512 cars, compared with 1,723 in 1928. Receipts from Pennsylvania were slightly higher, however,

there being 33 cars of apples, grapes and potatoes from points in the state, compared to 26 cars in 1928. Total receipts of potatoes dropped sharply from 358 to 184 cars, indicating that local production replaced much of the shipped-in stock in 1929.

Altoona Receipts. This market was one of the few cities in the state which showed increased carlot receipts of fruits and vegetables during 1929, compared with 1928, although the 1,292 cars received is still considerably below the 2,212 cars received in 1925. Cabbage, lemons, pears, plums, peppers, potatoes and strawberries were the only commodities which decreased during 1929 from 1928.

Lancaster Receipts. The 1929 receipts of fruits and vegetables declined to only 239 cars in Lancaster from 260 cars in 1928 and 406 in 1927. As in other cities near Philadelphia, Lancaster is securing greater supplies of trucked produce and fewer solid carlots.

Bethlehem Receipts. Fewer carlots were received in Bethlehem in 1929 than in any of the preceding 4 years, the decline being quite regular each year, and indicating the greater use of motor trucks in supplying that market with fruits and vegetables. Receipts of apples, bananas, cabbage, cantaloupes, carrots, celery, grapefruit, lettuce, oranges, potatoes, strawberries, sweet potatoes and tomatoes increased, however, while mixed produce and peaches showed the greatest decline from 1928.

York Receipts. This market indicates quite forcefully the extent to which trucking is replacing rail shipments of fruits and vegetables in many Pennsylvania cities. This market used 817 carlots in 1922 and only received 144 carlots by rail during 1929. Many commodities are no longer received in solid carlots, and bananas constitute over half of the entire carlot receipts.

Williamsport Receipts. An increase of 127 cars of fruits and vegetables was noted at Williamsport in 1929 over the 1928 receipts. Supplies of most commodities was greater during 1929, the principal exceptions being potatoes, peaches, apples, strawberries and watermelons.

Easton Receipts. Fewer carlots of fresh produce was received in Easton in 1929 than during any of the previous 4 years. The rail supply of all commodities decreased in this market during the year excepting bananas, cantaloupes, onions and sweet potatoes.

CARLOTS UNLOADED IN PHILADELPHIA—1929

PENNSYLVANIA DEPARTMENT OF AGRICULTURE

Organization and Services

C. G. JORDAN, *Secretary of Agriculture* R. G. BRESSLER, *Deputy Secretary*

This Department is essentially a service agency created by legislative enactment to deal with administrative, regulatory, investigational, and educational problems which can best be solved through public rather than individual action. The organization provides for coordination and cooperation with the Pennsylvania State College and the U. S. Department of Agriculture. The Department operates through the following bureaus:

ANIMAL INDUSTRY: T. E. MUNCE, *Director and State Veterinarian*

- Prevents and eradicates transmissible diseases of animals and poultry, including tuberculosis of animals, in cooperation with Federal Government;
- Demonstrates to veterinarians control methods for transmissible animal diseases;
- Supervises vaccination for and the prevention of hog cholera, anthrax, black leg and hemorrhagic septicemia;
- Protects public from unwholesome meats through ante and post mortem examinations of animals at slaughtering establishments;
- Inspects, licenses and furnishes information as to breeding, soundness and conformation of stallions and jacks standing for public service;
- Enforces law requiring licensing of dogs and providing for protection of livestock and people from attacks of uncontrolled dogs;
- Maintains laboratory for diagnostic research and experimental projects.

PLANT INDUSTRY: R. H. BELL, *Director*

- Tests agricultural seeds for purity and germination, and enforces State Seed Law;
- Inspects orchards, parks, farms, and plant imports for injurious insects and plant diseases;
- Inspects and licenses Pennsylvania nurseries, and licenses all dealers in nursery stock;
- Enforces laws governing apicultural practices, disease control and housing;
- Places and enforces quarantines and carries on eradication campaigns against insect pests and plant diseases;
- Inspects and certifies potatoes for seed purposes;
- Makes investigations for the control of injurious insects and plant diseases including field tests of insecticides, fungicides and weed killers;
- Maintains collections of insects, plant diseases, plants, and seeds, and identifies specimens.

FOODS AND CHEMISTRY: J. W. KELLOGG, *Director—Chief Chemist*

- Accomplishes its purpose of protecting Pennsylvania homes against harmful foodstuffs by sampling, analyzing, and bringing prosecution under the laws relating to foods and non-alcoholic drinks, including milk, cream, butter, ice-cream, eggs, sausage, fresh meats, soft drinks, fruit syrups, vinegar and kindred food products;
- Regulates and issues licenses for the manufacture and sale of oleomargarine;
- Licenses and regulates egg-opening plants and cold storage warehouses, maintaining regular inspection and enforcing twelve-month storage limit;
- Inspects milk plants and creameries and regulates weighing, testing, buying and selling of milk and cream on a butterfat basis;
- Protects honest manufacturers, importers, selling agents and ultimate users of feeding stuffs, fertilizers, lime products, linseed oil, paint, putty, turpentine, insecticides and fungicides, by means of annual registrations followed by inspections, analyses, prosecutions and the publication of the analyses of these products;
- Analyzes special samples for residents of the State at the rate of \$1.00 a sample for feeding stuffs, lime products and linseed oils.

MARKETS: GEO. A. STUART, *Director*

- Investigates and assists in the marketing of farm products; at present chiefly grain and hay, fruits and vegetables, poultry and eggs, and tobacco;
- Compiles and distributes daily market information as to supplies, shipments and prices;
- Advises growers on transportation of agricultural products;
- Assists cooperative associations and public markets;
